For models with entry on the right, install symmetrically to the pictures.*

### PRE-INSTALLATION - NOTES

Water inlet and outlet according to DIN 1986 and DIN 1986 as with a normal bathtub.  
In case of the integrated tub inlet (optional equipment) a pipe interrupter (type A2) according to EN 1717 is to be installed.

A pipe interrupter must be installed in accordance with the valid local standards and regulations!

Ensure that on-site preparations adhere to country-specific standards, e.g. ÖNORM B 2207 or DIN 18515-1 (standards for tiling/sealing against dampness). (Seal the splash area and the entire floor area with liquid sealing foil!)

**The two walls that the tub is mounted on must be at an exact 90-degree angle to one another.**

Electrical installation may only be carried out by a qualified, registered company in compliance with legislation guidelines as well as the currently valid edition of national installation regulations (e.g.; Austria OVE-E-8101; Germany DIN VDE 0100-701). Cable duct from above or below (min. 20 mm Ø, min. installation depth 5 cm). Separate mains supply line H05-VV-F (flexible line) over a RCD  $\Delta I_N \leq 30$  mA. For connection a cable of approx. 3 m should be provided. Take care to comply with current regulations about potential equalization! Potential equalization line, 4 mm<sup>2</sup> (Cu) for connection to the standard ground terminal.

The line has to have a double-pole cut-off, with a min. 3 mm contact opening (outside of protected zone 2, e.g. protection switched over light switch with control indicator) in accordance with VDE 0100-701 respectively OVE-E-8101.

### PROTECTED AREAS

For your personal safety, the protected areas must be adhered to exactly.

■ = Protected area 2:  
(Height 225 cm) No switches or power outlets allowed!

### ARTWEGER ARTLIFT Required work space

Do not install any fixtures or other protruding parts in this area!

Min. 5cm (if cladding exists)  
to 10cm

Min. 12cm (if cladding exists)  
10cm to 20cm

### INSTALLATION - on completed floor

	160/75	170/75	170/80	180/80
<b>k</b>	55	55	60	60

When installing the shower door on the already tiled wall a 1.2 cm compound bracket is required. Do not tile tub **before installation!**

The area **under the tub** must also be **completely tiled!** However, the walls must **not be tiled**

### INSTALLATION ON STRAIGHT WALL - on completed floor

When installing the shower door on the already tiled wall a 1.2 cm compound bracket is required. Do not tile tub **before installation!**

The area **under the tub** must also be **completely tiled!** However, the walls must **not be tiled**

### INSTALLATION - on raw concrete (casing dimensions)

Water (B) and electrical (C) connections possible only within designated areas!

	B	L
<b>160/75</b>	70	155
<b>170/75</b>	70	165
<b>170/80</b>	75	165
<b>180/80</b>	75	175

**IMPORTANT!** The dimensions of the casing must be observed exactly!

The tub can be set **exactly 13cm lower!**

Tub	a <sup>1</sup>	b <sup>1</sup>	e <sup>1</sup>	f <sup>1</sup>	g <sup>1</sup>	h <sup>1</sup>	i <sup>1</sup>
<b>160x75</b>	158	73,5	14,5	68,7	21,2	51	37,5
<b>170x75</b>	168	73,5	14,5	68,7	21,2	51	37,5
